Objective

To obtain a job as an engineer and Android software developer

Technical skills

Programming:

Android developer (Java, Xml, Eclipse, Motodev, sdk tools), the part I like most, developing from android 1.6

Other : Java(Eclipse, Acegi-security, log4j, junit, j2ee) , PHP, facebook php api)

Basic knowledge in: C, C #, VisualBasic, JavaScript, Microsoft technology (Visual Studio).

Web:

xhtml and css (with great attention to W3C standards)
javascript (and ajax frameworks: Dojo, jQuery, openlayers)
flash for me is a dead technology)

adsense, adwords, google apis (search, video, maps)

Software environments and systems:

- Experience with Linux servers, Windows servers, IIS and Apache
- Experience with access database,sqlite, hsql, mysql, Oracle.
- My IDE is Eclipse for programming and Adobe's suite

Mobile

- Developed various applications for Android.
- Outstanding expertise in developing any kind of software

Multimedia tools:

- Dreamwaver, Fireworks, Flash, Photoshop, Indesign, After Effects, DVD Architech etc.

Experience

Android developer

Finsoft S.r.l. (Turin, Italy) Cosulant at

Reply (Turin, Italy)
